We are calculating a course handicap for **All 18** holes.

The initial index is 11.1.

This player is on the **White** tee, the slope is 133, the rating is 70.9 and the par is 72.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 11.1 * 133 / 113 = 13.064\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is 11.964...

We apply a handicap adjustment percentage of 85.0%. The Playing Handicap becomes 10.169.... After rounding, the Playing Handicap is 10.

The player handicap is unaffected by the maximum handicap setting.

George Ackerman

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is 2.2.

This player is on the **CGA Green** tee, the slope is 122, the rating is 67.4 and the par is 72.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 2.2 * 122 / 113 = 2.375\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is +2.224...

We apply a handicap adjustment percentage of 85.0%. The Playing Handicap becomes +1.891.... After rounding, the Playing Handicap is +2.

The player handicap is unaffected by the maximum handicap setting.

Dennis Adkins

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is 4.4.

This player is on the **Black** tee, the slope is 125, the rating is 68.5 and the par is 72.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 4.4 * 125 / 113 = 4.867\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is 1.367....

We apply a handicap adjustment percentage of 85.0%. The Playing Handicap becomes 1.162.... After rounding, the Playing Handicap is 1.

The player handicap is unaffected by the maximum handicap setting.

Bob Albus

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is 4.0.

This player is on the **Black** tee, the slope is 125, the rating is 68.5 and the par is 72.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 4.0 * 125 / 113 = 4.424\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is 0.924....

We apply a handicap adjustment percentage of 85.0%. The Playing Handicap becomes 0.786.... After rounding, the Playing Handicap is 1.

The player handicap is unaffected by the maximum handicap setting.

Bruce Alter

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is 5.9.

This player is on the **White** tee, the slope is 133, the rating is 70.9 and the par is 72.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 5.9 * 133 / 113 = 6.944\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is 5.844....

We apply a handicap adjustment percentage of 85.0%. The Playing Handicap becomes 4.967.... After rounding, the Playing Handicap is 5.

The player handicap is unaffected by the maximum handicap setting.

Paul Amthauer

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **15.8**.

This player is on the **Black** tee, the slope is **125**, the rating is **68.5** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 15.8 * 125 / 113 = 17.477\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is **13.977...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **11.881...** After rounding, the Playing Handicap is **12**.

The player handicap is unaffected by the maximum handicap setting.

Mark Arrington

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **2.4**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 2.4 * 133 / 113 = 2.824\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **1.724...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **1.466...** After rounding, the Playing Handicap is **1**.

The player handicap is unaffected by the maximum handicap setting.

Bob Bacon

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **9.3**.

This player is on the **Black** tee, the slope is **125**, the rating is **68.5** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 9.3 * 125 / 113 = 10.287\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is **6.787...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **5.769...** After rounding, the Playing Handicap is **6**.

The player handicap is unaffected by the maximum handicap setting.

Jim Bartsch

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **7.9**.

This player is on the **Black** tee, the slope is **125**, the rating is **68.5** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 7.9 * 125 / 113 = 8.738\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is **5.238...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **4.453...** After rounding, the Playing Handicap is **4**.

The player handicap is unaffected by the maximum handicap setting.

John Beatty

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **3.4**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 3.4 * 133 / 113 = 4.001\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **2.901...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **2.466...** After rounding, the Playing Handicap is **2**.

The player handicap is unaffected by the maximum handicap setting.

Jerry Bohannon

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **8.9**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 8.9 * 122 / 113 = 9.608\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **5.008...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **4.257...** After rounding, the Playing Handicap is **4**.

The player handicap is unaffected by the maximum handicap setting.

Tom Bookmiller

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **6.3**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 6.3 * 122 / 113 = 6.801\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **2.201...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **1.871...** After rounding, the Playing Handicap is **2**.

The player handicap is unaffected by the maximum handicap setting.

Cameron Bosnic

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **7.5**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 7.5 * 133 / 113 = 8.827\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **7.727...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **6.568...** After rounding, the Playing Handicap is **7**.

The player handicap is unaffected by the maximum handicap setting.

Mike Bower

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **5.5**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 5.5 * 133 / 113 = 6.473\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **5.373...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **4.567...** After rounding, the Playing Handicap is **5**.

The player handicap is unaffected by the maximum handicap setting.

Mike Bright

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **4.1**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 4.1 * 133 / 113 = 4.825\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **3.725...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **3.166...** After rounding, the Playing Handicap is **3**.

The player handicap is unaffected by the maximum handicap setting.

Len Brooks

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **3.9**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 3.9 * 133 / 113 = 4.590\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **3.490...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **2.966...** After rounding, the Playing Handicap is **3**.

The player handicap is unaffected by the maximum handicap setting.

Steve Broome

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

The initial index is **6.7**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 6.7 * 122 / 113 = 7.233\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **2.633\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **2.238\dots** After rounding, the Playing Handicap is **2**.

The player handicap is unaffected by the maximum handicap setting.

Todd Haney

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **5.6**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 5.6 * 133 / 113 = 6.591\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **5.491\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **4.667\dots** After rounding, the Playing Handicap is **5**.

The player handicap is unaffected by the maximum handicap setting.

Scott Haynes

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **3.7**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 3.7 * 133 / 113 = 4.354\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **3.254\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **2.766\dots** After rounding, the Playing Handicap is **3**.

The player handicap is unaffected by the maximum handicap setting.

Rick Hazen

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **7.0**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 7.0 * 133 / 113 = 8.238\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **7.138\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **6.068\dots** After rounding, the Playing Handicap is **6**.

The player handicap is unaffected by the maximum handicap setting.

Dennis Helms

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **1.1**.

This player is on the **Black** tee, the slope is **125**, the rating is **68.5** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 1.1 * 125 / 113 = 1.216\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is **+2.283\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **+1.940\dots** After rounding, the Playing Handicap is **+2**.

The player handicap is unaffected by the maximum handicap setting.

Barnaby Henderson

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **12.2**.

This player is on the **Black** tee, the slope is **125**, the rating is **68.5** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 12.2 * 125 / 113 = 13.495\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is **9.995\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **8.496\dots** After rounding, the Playing Handicap is **8**.

The player handicap is unaffected by the maximum handicap setting.

Walter Hensler

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **9.5**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 9.5 * 122 / 113 = 10.256\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **5.656...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **4.808...** After rounding, the Playing Handicap is **5**.

The player handicap is unaffected by the maximum handicap setting.

Ken Hirst

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **15.1**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 15.1 * 133 / 113 = 17.772\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **16.672...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **14.171...** After rounding, the Playing Handicap is **14**.

The player handicap is unaffected by the maximum handicap setting.

Mark Hodges

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **2.0**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 2.0 * 133 / 113 = 2.353\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **1.253...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **1.065...** After rounding, the Playing Handicap is **1**.

The player handicap is unaffected by the maximum handicap setting.

Danny Hopkins

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **0.1**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 0.1 * 133 / 113 = 0.117\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **+0.982...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **+0.834...** After rounding, the Playing Handicap is **+1**.

The player handicap is unaffected by the maximum handicap setting.

Jimbo Howey

The initial index is **12.3**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 12.3 * 122 / 113 = 13.279\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **8.679\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **7.377\dots** After rounding, the Playing Handicap is **7**.

The player handicap is unaffected by the maximum handicap setting.

Daniel Northrup

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **13.9**.

This player is on the **Black** tee, the slope is **125**, the rating is **68.5** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 13.9 * 125 / 113 = 15.376\dots$ We apply a CR - P adjustment of $68.5 - 72 = -3.5$. The resulting Course Handicap is **11.876\dots**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **10.094\dots** After rounding, the Playing Handicap is **10**.

The player handicap is unaffected by the maximum handicap setting.

Scott O'Neal

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **8.3**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 8.3 * 133 / 113 = 9.769\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **8.669...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **7.368...** After rounding, the Playing Handicap is **7**.

The player handicap is unaffected by the maximum handicap setting.

Dick Pacella

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **9.0**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 9.0 * 122 / 113 = 9.716\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **5.116...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **4.349...** After rounding, the Playing Handicap is **4**.

The player handicap is unaffected by the maximum handicap setting.

Ken Piersa

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **4.4**.

This player is on the **White** tee, the slope is **133**, the rating is **70.9** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 4.4 * 133 / 113 = 5.178\dots$ We apply a CR - P adjustment of $70.9 - 72 = -1.1$. The resulting Course Handicap is **4.078...**

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **3.466...** After rounding, the Playing Handicap is **3**.

The player handicap is unaffected by the maximum handicap setting.

James Prouty

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

The initial index is **14.1**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 14.1 * 122 / 113 = 15.223\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **10.623**....

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **9.029**.... After rounding, the Playing Handicap is **9**.

The player handicap is unaffected by the maximum handicap setting.

Robert Zuercher

Note: The World Handicap System requires full precision to be maintained in intermediary calculations. Rounding is performed only once and as the last step.

We are calculating a course handicap for **All 18** holes.

The initial index is **6.1**.

This player is on the **CGA Green** tee, the slope is **122**, the rating is **67.4** and the par is **72**.

We calculate the Course Handicap as $\text{index} * \text{slope} / 113 = 6.1 * 122 / 113 = 6.585\dots$ We apply a CR - P adjustment of $67.4 - 72 = -4.6$. The resulting Course Handicap is **1.985**....

We apply a handicap adjustment percentage of **85.0%**. The Playing Handicap becomes **1.687**.... After rounding, the Playing Handicap is **2**.

The player handicap is unaffected by the maximum handicap setting.
